

Composite Technician Braider

Bonds a variety of dissimilar materials (composite, metal, or laminate) assemblies, parts, skins, components, equipment or structures into semi-finished or finished products. Lays out articles and cuts parts or materials to size. Applies liquid or solid bonding agents. Operates autoclave, hydraulic presses and ovens to complete bonding cycle. Controls conditions of heat, pressure and timing by setting and operating various controls according to the specifications for the materials and the bonding agent being used. Sands, burrs, smoothes over areas and applies sealing resins to cut or exposed edges. Monitors and verifies quality of finished product. Completes repairs on composite, metal or laminate bonded products using inspection and rework instructions. Verifies quality of finished product.

Level 1		Level 2		Level 3		Level 4	
Composite Tech Braider I		Composite Tech Braider II		Composite Tech Braider III		Sr. Composite Tech Braider/Sr. Lead Composite Tech Braider	
Knowledge	Little or no knowledge of the job. Moderate understanding of general job aspects and some understanding of the detailed aspects of the job.	Full knowledge of the job. Substantial acquaintance with, and understanding of, general aspects of the job with a broad understanding of the detailed aspects of the job.		Considerable knowledge of the job. Complete acquaintance with, and understanding of, the general and detailed aspects of the job and their practical applications to problems and situations ordinarily encountered.		Extensive knowledge in specialized functions. A wide and comprehensive acquaintance with, and understanding of, both general and specific aspects of the job and their practical application to complex problems and situations ordinarily encountered.	
Supervision Received	Close supervision involving detailed instructions and constant checking on work performance.	General supervision and instructions given for routine work and detailed instructions given for new activities or special assignments.		Limited supervision. No instructions needed on routine work and general instructions given on new lines of work or special assignments.		Minimal supervision. Work may be done without established procedures.	
Consequence of Errors	Errors can be easily and quickly detected within the immediate work unit and would result only in minor disruption or expense to correct.	Errors may be detected and corrected but may cause moderate loss of time or customer/user dissatisfaction.		Errors may be difficult to detect and would normally result in loss of customer business, material, or equipment to resolve.		Errors are very difficult to detect and would normally require significant expenditures to resolve.	
Contacts	Contacts are primarily within immediate work unit. Contacts involve obtaining or providing information requiring little explanation or interpretation.	Contacts are typically with individuals within own department and occasionally with contacts outside own organization. Contacts involve obtaining or providing information or data requiring some explanation or interpretation.		Contacts are frequent with individuals representing other departments, and/or representing outside organizations. Contacts involve obtaining or providing information or data on matters of moderate importance to the function of the department or which may be of sensitive nature.		Contacts are frequent with individuals representing outside organizations, and/or individuals of significant importance within the company. Contacts involve planning and preparation of the communications, require skill, tact, persuasion and/or negotiation to accomplish the objectives of the communication.

Work Products (Examples may include but are not limited to)	Use of ERP/MRP System software, including input of daily time sheets and good computer skills. Work from written work orders, verbal instructions from supervision and/or blue prints/drawings, while keeping all signoffs and inspection buyoffs current. Complete fabric lay-ups utilizing a variety of materials in order to manufacture parts per plans, orders and prints. Use measuring instrument and tools per manufacturing plans and processes. Winding of fiber spools and textile equipment used on braiding equipment. Use high pressure Resin Transfer Molding (RTM) pumps, equipment, pneumatic tools, etc. Properly use the release agents and tool preparation materials. Identify different process materials, such as fiberglass yarns, graphite yarns, pre-pregs, resins and adhesives as part of production processes. Maintain material logs on time-sensitive materials accurately. Cutting and kitting materials by hand and/or by automated cutting table. Set up tools and complete pre-form lay-ups and RTM operations per instructions. Vacuum bag detailed shapes & sizes and troubleshoot causes of vacuum loss to maintain bag integrity. Properly connect all vacuum source/transducer hoses and thermocouples in the autoclave and/or oven and program these operations using different software systems and controls. Load ovens and/or autoclaves with the use of forklifts, cranes and/or handling carts. De-molding, labeling and handling of cured parts in preparation for next level process. Maintain a clean work area per daily, monthly and yearly clean-up schedules.	Use of ERP/MRP System software, including input of daily time sheets and good computer skills.
