

Facilities Engineering Management: Sr. Manager, Facilities Engineering

Plans, designs and oversees the reconfiguration, maintenance and alteration of equipment, machinery, buildings, structures and other facilities. Gathers and reviews data concerning facility or equipment specifications, company or government restrictions, required completion date and construction feasibility. Coordinates with architecture/engineering firms in developing design criteria and preparing layout and detail drawings. Prepares bid sheets and contracts for construction and facilities acquisition. Reviews and estimates design costs including equipment, installation, labor, materials, preparation and other related costs. Inspects or directs the inspection of construction and installation progress to ensure conformance to established drawings, specifications and schedules.

Management Role

Generally accomplishes results through lower management levels.

Policy and Strategy

Establishes operating policies and procedures that affect departments and subordinate sections and work areas. Interprets company-wide policies and procedures. Develops budgets, schedules and performance standards.

Freedom to Act

Assignments are objective oriented. Work is reviewed in terms of meeting the organization's objectives and timelines.

Impact

Decisions have an extended impact on work processes and outcomes. Erroneous decisions result in critical delays and modifications to projects or operations; cause substantial expenditure of additional time, human resources and funds; and jeopardize future business activity.

Liaison

Interacts frequently with internal and external management and senior-level customer representatives concerning projects, operational decisions, scheduling requirements, and/or contractual clarifications. Leads briefings and technical meetings for internal and external representatives.

Operations Involvement/Direct Work Involvement

Provides a bridge between upper management and the operating arm of the business as regards to Facilities and Real Estate. Responsible to provide recommendations to upper management on all Facilities related issues. Little to no supervision required. Guidance and strategic vision from upper management necessary to execute plans.

Minimum Education and Experience

Bachelor's Degree in Engineering, Finance, Business or a related field and 12+ years of diverse professional experience in all areas of Facilities to include 5-7+ years of managing respective areas.
