

Maintenance Worker: Maintenance Worker II

Performs repairs and maintenance in plant or office facilities or on machines and equipment. Typically performs work in one or more of the maintenance trades: carpentry, plumbing, painting, machine and equipment repair, electrical, sheet metal fabrication and welding. Conducts routine, periodic or special inspections to determine repair and maintenance work necessary to prevent breakdowns of facilities, machinery and equipment. Uses hand and power tools. Tests, inspects, troubleshoots and repairs machines and equipment. Uses blueprints, sketches, layouts, wiring diagrams, drawings and specifications.

Knowledge

Full knowledge of the job. Substantial acquaintance with and understanding of general aspects of the job with a broad understanding of the detailed aspects of the job. Ability to use reasoning to diagnose and repair electrical and mechanical problems with equipment.

Supervision Received

General supervision and instructions given for routine work and detailed instructions given for new activities or special assignments.

Consequence of Errors

Errors may be detected and corrected but may cause moderate loss of time or customer/user dissatisfaction.

Contacts

Contacts are typically with individuals within own department and occasionally with contacts outside own organization. Contacts involve obtaining or providing information or data requiring some explanation or interpretation.

Work Products (Examples may include but are not limited to)

Work in hot, cold and/or dirty conditions at times. Able to use maintenance equipment such as hand tools, test equipment, machinery, forklifts, etc. Ladders, hazardous equipment and chemicals. Computers.

Minimum Education and Experience

High School Diploma or GED with strong mechanical aptitude with the ability to reason and diagnose basic mechanical problems. Training and certifications in electrical or mechanical maintenance is a plus. 2 years of maintenance experience.
