

Production Management: Associate Manager, Production

This description is intended for job classifications that have responsibilities for more than one functional area in this job family or over the entire job family.

Management Role

Accomplishes results through lower level subordinate supervisors or through experienced exempt employees who exercise significant latitude and independence in their assignments.

Policy and Strategy

Administers and executes policies, processes and procedures that affect subordinate employees and the workflow of the work area.

Freedom to Act

Assignments are task or activity oriented. Work is reviewed for soundness of judgment and overall quality and efficiency.

Impact

Decisions impact work area operations. Erroneous decisions or recommendations or failure to achieve results might cause delays in schedules and require the allocation of more people and financial resources.

Liaison

Interacts internally primarily with subordinates and other supervisors. External interaction is typically with suppliers vendors and/or customers. Primary purpose of liaison is information sharing and basic problem resolution.

Operations Involvement/Direct Work Involvement

Provides supervision to assigned sections and monitors performance of production processes. Collaborates with design engineering and supply base to resolve production issues. Reviews and approves engineering change notices. Generates performance metrics.

Minimum Education and Experience

Bachelor's Degree in Finance, Business or a related field and 7+ years of diverse professional experience in all areas of Finance which may include 3+ years of supervisory responsibilities.
