

Programmer Analyst: Programmer Analyst I

Builds and codes applications and/or modules using languages such as C++, ASP.NET, Visual Basic, ABAP, JAVA, XHTML, etc. Provides patches and upgrades to existing systems. May design graphical user interface (GUI) to meet the specific needs of users. Prepares operating instructions, compiles documentation of program development and analyzes system capabilities to resolve questions of program intent, output requirements, input data acquisition, programming techniques and controls. May build add-on modules using application program language.

Knowledge

Limited use and/or application of technical principles, theories and concepts.

Problem Solving

Develops solutions to routine technical problems of limited scope.

Discretion/Latitude

Work is closely supervised. Follows specific detailed instructions.

Impact

Contributes to the completion of routine technical tasks. Failure to achieve results can normally be overcome without serious effect on schedules and programs.

Liaison

Contacts are primarily with immediate supervisor, project leaders and other professionals in the section or group.

Work Products (Examples may include but are not limited to)

Program, code, test and debug approved solution using beginner level programming to a set of detailed specifications.

Minimum Education and Experience

0 - 1 year with Bachelor's Degree in Computer Science or other relevant major area of study.
