

Logistics Specialist: Sr. Logistics Specialist

Controls the efficient flow of goods, services and information between point-of-origin through customer placement in order to meet customer requirements. Ensures that customer service and time objectives are achieved within existing financial constraints in order to meet marketing and financial objectives. Ensures the execution and continuous improvement of standard logistics processes, such as the replenishment system, data interchange systems, demand management, electronic data systems administration and related functions. Builds relationships with strategic customers through logistics initiatives. Integrates learning from customers, competitors, operating entities, distribution, transportation, customer service, other industries, industry groups, and professional training to continuously improve competitive position.

Knowledge

Contributes to the development of new concepts, techniques and standards. Considered expert in field within the organization.

Problem Solving

Develops solutions to complex problems that require the regular use of ingenuity and innovation. Ensures solutions are consistent with organization objectives.

Discretion/Latitude

Work is performed without appreciable direction. Exercises considerable latitude in determining objectives and approaches to assignment.

Impact

Effects of decisions are long-lasting and heavily influence the future course of the organization. Errors in judgment or failure to achieve results would result in the expenditure of large amounts of company resources.

Liason

Serves as consultant to management and special external spokesperson for the organization on major matters pertaining to its policies, plans and objectives.

Work Products (Examples may include but are not limited to)
