

Logistics Specialist: Logistics Manager

Controls the efficient flow of goods, services and information between point-of-origin through customer placement in order to meet customer requirements. Ensures that customer service and time objectives are achieved within existing financial constraints in order to meet marketing and financial objectives. Ensures the execution and continuous improvement of standard logistics processes, such as the replenishment system, data interchange systems, demand management, electronic data systems administration and related functions. Builds relationships with strategic customers through logistics initiatives. Integrates learning from customers, competitors, operating entities, distribution, transportation, customer service, other industries, industry groups, and professional training to continuously improve competitive position.

Knowledge

Develops advanced concepts, techniques and standards. Develops new applications based on professional principles and theories. Viewed as expert in field within the corporation.

Problem Solving

Develops solutions to problems of unusual complexity that require a high degree of ingenuity, creativity and innovativeness. Challenges are frequently unique and solutions may serve as precedent for future decisions.

Discretion/Latitude

Works under consultative direction toward longrange goals and objectives. Assignments are often self-initiated. Virtually self-supervisory.

Impact

Decisions affect the financial, employee or public relations posture of the organization. Erroneous decisions or recommendations would normally result in failure to achieve goals critical to the major objectives of the organization.

Liason

Serves as prime consultant and external spokesperson for the organization on highly significant matters relating to policies, programs, capabilities and long-range goals and objectives
