

Provisioning Analyst: Provisioning Analyst II

Analyzes technical data and reports to determine spares and support equipment provisioning requirements. Reviews site survey results and letters of offer and acceptance, and formulates specific recommendations for spare/repair parts and support equipment. Manages and controls the asset position of customer inventories. May originate support plans for offer to potential customers and provide technical assistance to existing customer personnel. May forecast and manage budget system.

Knowledge

Frequent use and general knowledge of industry practices, techniques, and standards. General application of concepts, and principles.

Problem Solving

Develops solutions to a variety of problems of moderate scope and complexity. Refers to policies and practices for guidance.

Discretion/Latitude

Works under only very general supervision. Work is reviewed for soundness of judgment, overall adequacy and accuracy.

Impact

Contributes to the completion of organizational projects and goals. Errors in judgement or failure to achieve results would normally require a moderate expenditure of resources to rectify.

Liason

Frequent internal company and external contacts. Represents organization on specific projects.

Minimum Education and Experience

3+ years directly related experience with Bachelor's Degree in Business or related field. Intermediate MS Word, PowerPoint and Excel skills.
