

# Provisioning Analyst: Sr. Provisioning Analyst

---

Analyzes technical data and reports to determine spares and support equipment provisioning requirements. Reviews site survey results and letters of offer and acceptance, and formulates specific recommendations for spare/repair parts and support equipment. Manages and controls the asset position of customer inventories. May originate support plans for offer to potential customers and provide technical assistance to existing customer personnel. May forecast and manage budget system.

## **Knowledge**

Contributes to the development of new concepts, techniques, and standards. Considered expert in field within the organization.

## **Problem Solving**

Develops solutions to complex problems that require the regular use of ingenuity and innovation. Ensures solutions are consistent with organization objectives.

## **Discretion/Latitude**

Work is performed without appreciable direction. Exercises considerable latitude in determining objectives and approaches to assignment.

## **Impact**

Effects of decisions are long-lasting and heavily influence the future course of the organization. Errors in judgment or failure to achieve results would result in the expenditure of large amounts of company resources.

## **Liason**

Serves as consultant to management and special external spokesperson for the organization on major matters pertaining to its policies, plans, and objectives.

## **Minimum Education and Experience**

10+ years directly related experience with Bachelor's Degree in Business or related field. Advanced MS Word, PowerPoint and Excel skills.
